MiFID II product governance - solely for the purposes of each manufacturer's product approval process, the target market assessment in respect of the Bonds has led to the conclusion that: (i) the target market for the Bonds is eligible counterparties, professional clients, and retail clients, each as defined in MiFID II; and (ii) all channels for distribution of the Bonds to eligible counterparties, professional clients and respective retail clients are appropriate. Any person subsequently offering, selling or recommending the Bonds should take into consideration the manufacturer's target market assessment. However, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Bonds (by either adopting or refining the manufacturer's target market assessment) and determining appropriate distribution channels.

Article 5f of Regulation (EU) No. 833/2014 (as amended by Council Regulation (EU) No. 2022/328) and Article 1f of Regulation (EC) No. 765/ 2006 (as amended by Council Regulation (EU) No 2022/398) prohibit the sale of euro denominated transferable securities issued after 12 April 2022 or units of undertakings for collective investment (UCIs) providing exposure to such transferable securities, to any Russian or Belarusian national, any natural person residing in Russia or Belarus or to any legal person, entity or body established in Russia or Belarus. Before deciding to purchase the Bonds, prospective investors must make their own assessment as to the suitability of investing in the Bonds. Each prospective investor should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the Bonds and the merits and risks of investing in the Bonds;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Bonds and the impact the Bonds will have on its overall investment portfolio;
- (iii) have sufficient financial resources and liquidity to bear all the risks of an investment in the Bonds, including where the currency for principal or interest payments is different from the potential investor's currency;
- (iv) understand thoroughly the terms of the Bonds and be familiar with the behaviour of any relevant financial markets; and
- (v) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

Investment in the Bonds to be issued under the Programme involves certain risks. Prospective investors should carefully acquaint themselves with such risks before deciding to invest in the Bonds. The principal risk factors that may affect the Issuer's ability to fulfil its obligations under the Bonds are discussed in Section 2 "Risk Factors" of this Base Prospectus. Should one or more of the risks materialize, this may have a material adverse effect on the cash flows, results of operations, and financial condition of the Issuer. If any of these risks materialize, the market value of the Bonds and the likelihood the Issuer will be able to fulfil its payment obligations under the Bonds may decrease, in which case the Bondholders could lose all or part of their investments.

Any previous discussions or presentations provided to prospective investors were solely for information purposes and the Bonds are issued in accordance with this Base Prospectus and Final Terms. A prospective investor should not make an investment decision relying solely upon the information provided to the prospective investor in any presentation or otherwise.

This Base Prospectus or the Final Terms are not to be distributed to the United States or in any other jurisdiction where it would be unlawful. The Bonds may not be offered, sold, pledged or otherwise transferred, directly or indirectly, within the United States or to, for the account or benefit of, U.S. persons (as defined in Regulation S under the Securities Act (the "**Regulation S**"), except to a person who is not a U.S. Person (as defined in Regulation S) in an offshore transaction pursuant to Regulation S.

2 RISK FACTORS

Investing into the Bonds entails various risks. Each prospective investor in the Bonds should thoroughly consider the risk factors and all the information in this Base Prospectus. Any of the risk factors described below, or additional risks not currently known to the Management Board or not considered significant by the Management Board, could have a material adverse effect on the business, financial condition, operations or prospects of the Issuer, and result in a corresponding decline in the value of the Bonds or the ability of the Issuer to redeem the Bonds. As a result, investors could lose a part or all the value of their investments. The Management Board believes that the factors described below present the principal risks inherent in investing into the Bonds. The risk factors are presented in categories and where a risk factor may be categorised in more than one category, such risk factor appears only once and in the most relevant category for such risk factor. The risk factors in a category are presented considering the materiality and probability of occurrence of a particular risk.

The potential magnitude of each risk towards the business of the Issuer has been categorised as "low", "medium" or "high" in the opinion of the Management Board at the date of this Base Prospectus. Risk categories are provided for ease of reference and cannot be understood separately from the description of each risk.

This Base Prospectus is not, and does not purport to be, investment advice or an investment recommendation to acquire the Bonds. Each prospective investor must determine, based on its own independent review and analysis and such professional advice as it deems necessary and appropriate, whether an investment into the Bonds is consistent with its financial needs and investment objectives and whether such investment is consistent with any rules, requirements and restrictions as may be applicable to that investor, such as investment policies and guidelines, laws and regulations of the relevant authorities.

2.1 Risk factors related to macroeconomic and geopolitical environment

Geopolitical risk

In February 2022, Russia launched a military attack on Ukraine. This military assault has impacted the global economic activities, market stability and overall investor confidence. At the date of this Base Prospectus, the restrictive sanctions and measures imposed against Russia and Belarus have not directly affected the Issuer's activities. At the same time, the Project of the Issuer is developed and located in Latvia. Because the Baltic states are proximate to Russia, it can impact the overall investor activity in the region and deter the flow of foreign investment. Decline in investor and consumer confidence may also reduce the commercial activity and demand in the local real estate market.

The Issuer considers geopolitical risk as low.

Global pandemic risk

The Issuer may be impacted by the global pandemic situation, however there is uncertainty around the severity of any such pandemic. Many businesses may be negatively affected by unprecedented nature and extent of global pandemics. COVID-19 situation has additionally contributed to and increased market uncertainties. As the Project involves lease of commercial real estate, the Issuer is dependent on the ability of potential tenants to fulfil their obligations under lease contracts. While the definite outcome is uncertain, any global pandemic challenges may cause financial difficulties, especially for tenants from certain sectors, and their ability to meet lease obligations.

The Issuer considers global pandemic risk as low.

2.2 Risk factors related to the industry of the Issuer

Real estate and office market risk

Potential negative development of the Latvian real estate market could have a negative impact on both real estate market prices and market transaction volume. Even though around the date of the Base Prospectus the Latvian real estate market is considered as remaining stable, the real estate market's performance is intricately tied to economic conditions, including factors like inflation, interest rates, and geopolitical events, such as the war in Ukraine. In times of economic downturn, rental incomes decrease, and unemployment rises, posing challenges for securing solvent tenants and rent collection by the Issuer. This dynamic may result in declining asset prices, impacting the Issuer's financial standing and the value of real estate assets to be used as Collateral securing the Bonds.

Also, considering that the Phase A of the Project involves constructing a 28,300 m² A+ class commercial

building, the conditions of the Riga office market shall contribute to the Project's success. Until now, the Riga office market has shown relative stability and according to Q42024 Colliers Riga Office Market Overview office take-up reached near-record 59,100 m2 in 2023, while 2024 was only marginally lower at 53,300 m2. Nevertheless, the office market can be subject to rapid volatility. Factors such as economic conditions, changes in supply and demand, geopolitical events, and shifts in technology can all contribute to fluctuations in the office real estate market. These fluctuations can affect rental rates, occupancy levels, and property values, making the market susceptible to rapid changes. Therefore, there is no guarantee that the Issuer will succeed in finding tenants for office premises of the Project.

These factors collectively underscore the complexity of current market conditions and the challenges involved in securing full occupancy for the Project. Such conditions could significantly influence the Project's success, the financial standing of the Issuer, and thus, indirectly affect the Issuer's ability to repay the Bonds.

The Issuer considers real estate and office market risk as medium.

Risk related to competition and occupancy of the Project premises

The Issuer operates in Riga, Latvia, where the Project is located. Riga city has number of existing high-quality offices, and new office spaces continue to develop. Offices with existing presence have established relationships in the market, whereas the new entrants increase the competition, especially if they bring new and innovative concepts, technologies or competitive pricing. In addition, there is a growing tendency for co-working spaces that can affect the demand for traditional office spaces, particularly for smaller and medium sized enterprise segment. Saturated competition may increase pressure to attract tenants for the Project or reduce the rental rates in the market, which in turn, can reduce the Project profitability and return on the investment.

The A phase of the Project is scheduled to be completed in the middle of 2026 and only starting from this date, the first tenants will be able to move into the premises. The Issuer must ensure sufficient level of occupancy of the Project premises to generate the funds. The Management Company and the Issuer are currently making their best efforts in searching and attracting the tenants for the Project's premises, and number of lease agreements have been concluded with office and retail tenants at the date of this Base Prospectus. There are no indications of a slowdown in the real estate market in Latvia. The recent research suggests the occupancy rate of newly constructed offices exceeds 80%, underscoring a strong demand-supply dynamic, particularly in prime locations in Riga. Nevertheless, competition among developers of business centres remains intense, potentially making it challenging for the Issuer to attract tenants without offering discounts or making additional investments in furnishing the premises.

The Issuer considers risk related to competition and occupancy of the Project premises as medium.

2.3 Risk factors related to the Issuer's business

Construction cost and Project success risk

Considering that the Issuer is raising financing for further completion and development of the Project, the obligations of the Issuer under the Bonds are subject to the Issuer's ability to complete the Project on time and repay its obligations.

The completion of the A and largest Phase of the Project is planned in 2026 (originally it was planned to complete constructions in 2023). Despite a change in the general contractor, the Project continues to progress successfully. However, the frequent changes in the global markets and the building materials supply chain, primarily due to the war in Ukraine and the related economic and geopolitical situation in the region, including instability in the energy market, (despite of the fact that the Project is being built as energy efficient and therefore, the Project is more resistant to fluctuations in energy prices), there is a remote risk of unexpected increase in construction costs. As of the time of this Base Prospectus, the Project is progressing within its budgetary constraints. However, it should be noted that should there be unexpected increases in construction costs, it may become necessary for the Issuer to secure additional funding through debt. However, obtaining this extra financing could be challenging for the Issuer due to various factors or inability to secure construction material required to complete the Project that may reduce the overall profitability of the Project, delay the completion of the Project or affect its timeline and as a result adversely affect the Issuer's plans, activities, financial situation, and ability to repay the Bonds.

At the date of this Base Prospectus and as detailed in Section 8.5 "Legal Proceedings", the Issuer and the Subsidiary are involved in multiple litigations with previous contractors of the Project, with outcomes pending, although risk of substantial financial loss on the side of Issuer shall be deemed as being low in the scope of project investment programme. Moreover, since the construction of the Project is ongoing and even unpredictable may happen, the Issuer cannot assure that it will avoid any further disputes with suppliers or maintain existing relationships, especially should a ground and a need for litigation arise on the side of the Issuer. Any supply chain disruptions or damage to supplier integrity may result in significant

costs, loss and reputation damage, potentially impacting the Issuer's profitability and ability to repay the Bonds in time.

The Issuer considers construction cost and Project success risk as medium.

Management and human resources risk

The Issuer's ability to repay the Bonds depend on the employees and management teams of the Issuer and Management Company, their decisions, competences and experiences.

The Issuer's success in further development and completion of the Project depends on qualified executives and employees of the Issuer with special expertise in the development, financing, engineering, construction, operation and maintenance of real estate projects. The Management Company's personnel are also contributing to the success of the Project. Therefore, given the combined Issuer's and Management Company's teams' expertise in the industry, their knowledge of the business processes and their relationships with local partners, the loss of the services of one or more of key individuals could have a material adverse effect on the Issuer's and/or Management Company's business, financial condition, results of operations or prospects.

Additionally, from time to time, executives, and other employees with technical or industry expertise may leave the Issuer and/or Management Company. The Issuer's and/or Management Company's failure to promptly appoint qualified and effective successors for such individuals or inability to effectively manage temporary gaps in expertise or other disruption created by such departures, could have a material adverse effect on the Issuer's and Management Company's business, financial condition, results of operations or prospects. Any long-term performance deficiencies that adversely affect the development of the Project may have an indirect negative impact on the Issuer's operations and financial standing.

The Issuer considers management and human resources risk as low.

2.4 Legal and regulatory risk factors

Risk of legal disputes

As disclosed in Section 8.5 "Legal Proceedings" of this Base Prospectus, the Issuer is currently involved in legal proceedings because of disputes with contractors due to termination of construction agreement and related issues. Any negative outcome of the ongoing legal disputes in which the Issuer is currently involved, may impact the Issuer's financial standing and reputation as the Issuer may be obligated to cover awarded damages, including the legal expenses of the opposing party, incurring additional legal costs itself.

Furthermore, there is no guarantee that there will be no future disputes with the Issuer's tenants, contractors or other parties, the outcome of which is currently unpredictable. In the unlikely event that a dispute is resolved unfavourably for the Issuer, this could affect the Issuer's capacity to fulfil its obligations and therefore, also the Issuer's ability to repay the Bonds. This may also impact the attractiveness and liquidity of the Bonds.

The Issuer considers risk of legal disputes as low.

2.5 Financial risk factors

Risk related to incurring additional debt

According to this Base Prospectus the Issuer shall not assume any Financial Indebtedness, however certain exceptions are included as part of negative borrowing covenants provided in Clause 12.22.1 "Negative borrowing". Amongst others, these include, for instance Financial Indebtedness not exceeding EUR 50 000 in aggregate during the year, or non-interest-bearing Financial Indebtedness incurred in the ordinary course of business of the Issuer, or Financial Indebtedness related to Project development expenses. If the Issuer incurs significant additional debt, the Issuer's ability to service its Financial Indebtedness, including the Bonds, might deteriorate, the amount recoverable by Bondholders in case of Issuer's insolvency might decrease.

The Issuer considers risk related to incurring additional debt as medium.

Credit and default risk of the Issuer

Investment in the Bonds is subject to credit risk, which means that the Issuer may fail to meet its obligations arising from the Bonds duly and in a timely manner. The Issuer's ability to meet its obligations arising from the Bonds and the ability of the Bondholders to receive payments arising from the Bonds depends on the financial position and the results of operations of the Issuer, which are subject to other

risks described in this Base Prospectus. In case of insolvency of the Issuer, there is a risk that the Bondholders would not receive any payments related to the Bonds or part thereof.

The Issuer considers credit and default risk of the Issuer as medium.

Risks related to Issuer's financial standing

The Issuer's financial condition is and will remain of great importance to both the Issuer and the Bondholders, since it not only carries out the Project, but is also subject to underlying obligations of the Intercompany Loan Agreement, which are expected to be covered by part of the proceeds raised under the Bonds after covering Project related expenses.

Furthermore, the only key asset the Issuer controls is the land plot with unfinished construction. The Project in development is accounted for under the fair value principle. Specifically, the value of the Issuer's assets is adjusted periodically, based on the most recent independent real estate valuation (pursuant to the latest real estate valuation report of SIA "NEWSEC VALUATIONS LV" dated 15 November 2024, the estimated market value of the Property by 30 September 2024 was EUR 62 610 000).

The Issuer considers risks related to Issuer's financial standing as low.

2.6 Risk factors related to the Bonds

Early redemption risk

According to the Terms and Conditions of the Offering of this Base Prospectus, the Bonds may be redeemed prematurely at the initiative of the Issuer. If the early redemption right (call option) is exercised by the Issuer, the rate of return from an investment into the Bonds may be lower than initially anticipated by the Investor since the potential investor may not be able to re-invest the proceeds of redemption in a comparable security at an effective interest rate compared to redeemed Bonds.

The Issuer considers early redemption risk as medium.

Refinancing risk

With the proceeds from this Bond Programme, the Issuer plans to fully redeem the Existing Bonds; also delete prohibition mark established for the benefit of UAB "Audifina", and pledge marks established for the benefit of AS "UPB" and UAB "YIT Lietuva". A failure to secure full refinancing would mean that the Collateral would rank below other mortgage and pledge marks.

The Issuer considers refinancing risk as medium.

Liquidity risk

The Bonds are newly issued securities by the Issuer, currently lacking an active trading market, which may lead to potential illiquidity and price fluctuations. Their liquidity and value are closely linked to the Issuer's financial health and the success of the real estate project. If negative events occur, such as financial instability or Project setbacks, Bondholders may find it difficult to sell their Bonds on the secondary market.

Although application will be made for inclusion to listing and trading of Bonds on the Regulated Market, the establishment of an active trading market cannot be assured. The potential Investor should consider the fact that they may not be able to sell or may face difficulties in selling the Bonds on the secondary market at their fair market value or at all. Each prospective investor is encouraged to perform a comprehensive market analysis and assess the prevailing economic conditions that may impact the liquidity of Bonds. Furthermore, potential Investor should consider the potential influence of external market forces, legislative changes, or unforeseen economic events that could affect the secondary market for the Bonds.

The Issuer considers liquidity risk as medium.

Inflation risk

At the date of this Base Prospectus high inflation is viewed globally as one of the main macroeconomic factors posing significant risk to global economic growth and consequentially to the value of both equity and debt securities. Inflation reduces the purchasing power of a Bond's future interest and Nominal Value. Inflation may lead to higher interest rates which could negatively affect the Bonds price in the secondary market.

The Issuer considers inflation risk as low.

Interest rate risk

The Bonds bear interest on their outstanding Nominal Value at a fixed interest rate. While the interest rate of the Bond is fixed until redemption, the prevailing capital market rates change daily. At the date of this Base Prospectus, the prevailing capital market rates are higher than the fixed interest rate for the Bonds. Therefore, considering the high competition in the capital markets, it might be difficult for the Issuer to attract the required external financing for the completion of the Project. If the market interest rates continue to increase, the market value of the Bonds may fall, the potential Investors may lose interest in the Bonds and it might be difficult to sell the Bonds on a secondary market.

The Issuer considers interest rate risk as low.

Risk related to transaction costs/charges

When the Bonds are purchased/subscribed or sold, several types of incidental costs are incurred in addition to the purchase/issue or sale price of the Bonds. To the extent that additional – domestic or foreign – parties are involved in the execution of an order, including but not limited to domestic dealers or brokers in foreign markets, Investors may also be charged for the brokerage fees, commissions and other fees and expenses of such parties and/or there might be other charges that could not be foreseen by the Issuer and disclosed in this Base Prospectus.

Moreover, changes to the laws and legal acts applicable in Latvia and/or the Investor's domicile, or the implementation of any new laws or other legal acts may cause additional expenses or taxes for the Investors and/or reduce the return on investment for the Investor.

The Issuer considers risk related to transaction costs/charges as low.

Offering cancellation and delisting risk

After registration of Bonds, the Issuer anticipates applying for admission to trading of Bonds on the Baltic Bond List of Nasdaq Riga. There is a risk that Nasdaq Riga will not accept the Bonds to be admitted to trading on the Baltic Bond List or order that the Bonds are de-listed from the Baltic Bond List prior to maturity after admission to trading, due to changes in Applicable Law and/or Nasdaq Riga regulations.

In addition, the Issuer is entitled to change the dates of the opening and closing of a Subscription Period of Bonds in accordance with this Base Prospectus and Final Terms. The Issuer will apply its best effort to ensure that the Offer of Bonds under this Base Prospectus occurs as initially planned, however, the Issuer cannot guarantee that the potential Investor who has subscribed for the Bonds will obtain the Bonds to which the potential Investor has subscribed for. Such changes in the dates of the Subscription Period, postponement or cancellation of the Offering of Bonds under any Tranche may negatively affect the investment plan of potential Investor.

The Issuer considers offering cancellation and delisting risk as low.

Risk of bond suitability as a financial instrument

The suitability of the Bonds as an investment may vary among potential Investors. Prior to investing, each potential Investor should thoroughly evaluate their individual circumstances, ensuring they possess adequate financial resources and liquidity to withstand potential risks associated with the Bonds, including the possibility of losing a substantial portion of their invested capital.

It is imperative that Investors possess the requisite knowledge and experience to assess the merits and risks of the Bonds, as well as access to appropriate analytical tools to evaluate their impact on their overall investment portfolio. Additionally, Investors should understand the terms of the Bonds, familiarize themselves with relevant market behaviour, and consider various economic and interest rate scenarios. Notably, the Issuer does not undertake an assessment of the Bonds' suitability for prospective investors, thus subscribing directly through the Issuer without conducting thorough evaluation may result in an unsuitable investment decision.

The Issuer considers risk of bond suitability as a financial instrument as low.

2.7 Risk factors related to the Collateral

Risks related to existing mortgages and pledge marks

At the date of this Base Prospectus there are several pledge marks, prohibition marks and mortgage claims to the Property entered in the Land Register. There is a mortgage for Existing Bonds (to UAB "AUDIFINA"), mortgage claim from previous general contractor AS "UPB" and pledge marks from two general contractors – AS "UPB" and UAB "YIT Lietuva", and recovery notation from AS "UPB" with the total outstanding amount of EUR 2 786 060,47. Management Board of the Company expects to delete these pledge marks and mortgage claims after the Exchange Offering and first or second tranche of Bonds issuance, if sufficient

funds are attracted. Management Board of the Company expects to remove AS "UPB" and UAB "YIT Lietuva" claims either through Conversion Offering or negotiations for a final settlement.

For the benefit of AS "UPB" a recovery notation in the amount of EUR 2 786 060,47 is registered in the Land Book of the Property at the date of this Base Prospectus. Until this recovery notation is removed, the Issuer will not be able to register the Collateral in favour of the Collateral Agent to hold for the benefit of the Bondholders. The Issuer intends to resolve this matter and complete the registration of the Collateral within 60 Business Days following the issuance of the first or second tranche of the Bonds. If the Issuer fails to remove the recovery notation and register the Collateral, the Bonds will remain unsecured, which may affect the Bondholders' ability to recover their invested capital.

The Issuer considers risks related to existing mortgages and pledge marks as high.

Risks related to registration of the Collateral

The Base Prospectus currently provides that the Collateral will be registered 60 Business Days following the issuance of the first Tranche of the Bonds, which is in line with standard market practice in the bond market. Consequently, during this 60 Business Day period, the Bonds will be unsecured and not backed by any collateral.

As of the date of this Base Prospectus, a recovery notation in favour of AS "UPB" is registered in the Land Book of the Property. Until this recovery notation is removed, the Issuer will not be able to register the Collateral securing the Bonds.

The Issuer is in the process of negotiating the removal of the recovery notation. However, if the recovery notation is not removed and therefore the Collateral is not registered and an Event of Default occurs within this period, Bondholders will be treated as unsecured creditors of the Issuer.

The Issuer assesses the risk associated with the registration of the Collateral as high.

Risk of insufficient value of the Collateral

The Bonds issued under this Base Prospectus will be secured by the Collateral. The maximum amount of secured claim of the Collateral will be up to EUR 82 500 000 for the benefit of the Bondholders, with the claim amount specified in the Final Terms of the respective Tranche according to the total aggregate amount of Bonds issued under the Programme at the time. The real estate Property is being currently developed and constructed in Latvia. As a result, the value of the Collateral (once the Collateral is created) will directly depend on the construction progress and successful completion of the Project and in case of the Issuer's default before the end of construction stage the value of the Collateral could be not high enough to cover Issuer's obligations to the Bondholders.

In addition, in case of negative development of Latvian real estate market and resulting significant drop in the value of the Collateral even after completion of the Project, the value of Collateral could be not high enough that all claims of the Bondholders could be satisfied. Please note that pursuant to the real estate valuation report of SIA "NEWSEC VALUATIONS LV" dated 15 November 2024, the estimated market value of the Property by 30 September 2024 was EUR 62 610 000. Value of the Property that is subject to the Collateral is expected to increase following the construction progress and successful completion of the Project.

Notably, value of the Collateral may vary from time to time, however in case of enforcement, the claims of the Bondholders will be satisfied on behalf of the Collateral Agent from the value of the Collateral existing at the time of the Collateral realization that is determined and carried out in accordance with the relevant laws of Latvia. It shall be noted that in case of enforcement, the foreclosure of the relevant Collateral may be prolonged (for example, it may be hard to find buyers of the Collateral).

Moreover, the funds received upon realization of the Collateral as a first priority will be used for the satisfaction of and payment of all costs and expenses (including, without limitation, Collateral Agent's fees, state duties, notary fees) related to or arising from enforcement (realization) of the Collateral incurred by the Collateral Agent as provided by the Collateral Agent Agreement and Base Prospectus. Hence, the Bondholders will receive only the remaining amounts after satisfying the respective claims.

The Issuer considers risk of insufficient value of the Collateral as medium.

Risks related to amendments to laws and regulations

There is a general risk that amendments to laws and regulations governing Collaterals, which secure the Bonds, as well as laws and regulations governing rights and obligations of the Collateral Agent may introduce uncertainty to Bondholders. Namely, there is a general risk that regulatory changes may affect the enforceability of Collateral securing the Bonds, potentially affecting the Bondholders' position.

The Issuer considers risks related to amendments to laws and regulations as low.

Risks associated with the Collateral Agent Agreement

Collateral Agent represents the Bondholders in all matters concerning the Collateral, which secures the Bonds under this Base Prospectus. There is a risk the Collateral Agent, or any appointed party, may not fulfil its obligations adequately in terms of perfecting, maintaining, enforcing, or undertaking other necessary actions in relation to the Collateral. Pursuant to the terms outlined in the Collateral Agent Agreement, the Collateral Agent is authorized to engage in agreements with third parties or undertake any other actions deemed necessary to maintain, release, or enforce the Collateral, as well as resolve any disputes regarding the rights of Bondholders in respect to the Collateral.

The Issuer considers risks associated with the Collateral Agent Agreement as low.

Risks related to limitations and procedures concerning enforcement of the Collateral

The enforcement of the Collateral securing the Bonds, is subject to the procedures and limitations provided in the Collateral Agreement, Collateral Agent Agreement, this Base Prospectus and Applicable Law. There is no assurance to the ability of the Bondholders to instruct the Collateral Agent to initiate any enforcement procedures. Furthermore, any enforcement of security may be delayed due to the provisions of the Collateral Agreement, Collateral Agent Agreement and Base Prospectus. In addition, the Collateral enforcement costs may be disproportionate to the amount being recovered, and such costs may be beyond the control of the Collateral Agent.

Furthermore, according to Collateral Agent Agreement and this Base Prospectus, the Collateral Agent may resign from its role in certain conditions. The Majority Bondholders may also pass a decision to replace the Collateral Agent. The Collateral Agent's professional liability is insured with an insurance company If P&C Insurance AS Latvijas filiāle with the insured amount EUR 2 000 000.

The Issuer considers risks related to limitations in procedures concerning enforcement of the Collateral as low.

Risks related to the actions and financial standing of the Collateral Agent

By subscribing for, or accepting the assignment of, any Bond, each Bondholder accepts the appointment of the Collateral Agent as the agent and representative of the Bondholders, to represent and act for such secured creditors, i.e., the Bondholders in relation to the Collateral. Thus, only the Collateral Agent is entitled to exercise the rights under the Collateral and enforce it. Any failure to perform its duties and obligations properly, or at all, may adversely affect the enforcement of the rights of the Bondholders due to, for example, inability to enforce the Collateral and/or receive any or all amounts payable from the Collateral in a timely and effective manner due to decisions of state courts in the jurisdiction where the Collateral is located.

The actions and financial standing of the Collateral Agent present low risks.

2.8 Risk of Inaccurate Property Valuations

Risks related to inaccurate property valuations

Real estate valuations are subjective assessments by external property appraisers that are influenced by a number of variables, assumptions, and methodologies that may result in the valuation being inaccurate. In particular, uncertainties impacting valuation statements include, amongst other factors, the lack of liquidity of real estate assets, the availability of debt funding, the nature of each property, its location, the expected future rental income from that particular property and the valuation methodology used to assess that property's value. This is especially true when there are few or no comparison sales. In addition, property appraisals are based on assumptions that may prove erroneous. Property appraisers make certain assumptions on the future development of the real estate market, such as market yields and market rents.

The Group appraises the Property on a yearly basis. There is no single valuation standard for determining fair value in good faith and, in many cases, fair value is best expressed as a range of fair values from which a single estimate may be derived. Fair values may be established using various approaches, such as discounted cash flow, a market comparable approach that is based on a specific financial measure (such as rental income, net operating income, value per square meter or other metrics) or, in some cases, a cost basis or liquidation analysis. Valuations are inherently uncertain and may therefore fluctuate over short periods of time and may be based on estimates and determinations of fair value which may differ materially from the values that would have resulted if a liquid market had existed. Even if market quotations are available for the Group's properties (including Property), such quotations may not reflect the value that the Group would actually be able to realize because of various factors, including the illiquidity of the underlying assets, the speculative nature of investment property, future market price volatility or the potential for a future loss in market value based on poor real estate market conditions. There can also be no assurance

that these valuations will be reflected in the actual transaction prices, even where any such transactions occur shortly after the relevant valuation date, or that the estimated yield and annual rental income will prove to be attainable.

The Issuer considers risks related to inaccurate property valuations as low.

However, in relation to each member state of the European Economic Area (the "**EEA**") (except the Republic of Latvia, the Republic of Lithuania and the Republic of Estonia), the Issuer represents that it has not made and will not make any public offer of Bonds prior to that EEA member state's authority receiving a certificate of approval of the Bank of Latvia attesting that the Base Prospectus has been drawn up in accordance with the Prospectus Regulation together with a copy of the Base Prospectus.

Accordingly, any person making or intending to make an offer within the EEA of Bonds which are the subject of an offering contemplated by this Base Prospectus and the relevant Final Terms (other than the offer of Bonds in the Republic of Latvia, the Republic of Lithuania and the Republic of Estonia) may only do so in circumstances in which no obligation arises for the Issuer to publish a prospectus pursuant to Article 3 of the Prospectus Regulation or supplement a prospectus pursuant to Article 23 of the Prospectus Regulation, in each case, in relation to such offer.

6.2 Financing of activities

The Issuer will use the proceeds received by the Bonds issuance and invest in real estate development activities. The operational activities are funded and will remain funded by the equity injections of the Sole Shareholder.

All proceeds from the Issue are being used for the purposes disclosed in Section 5 "Reasons for Offer and use of Proceeds" of this Base Prospectus. The total amount to be raised will be up to EUR 75 000 000.

It is anticipated that the Bond issuance will be refinanced through external loans from banks or other financial institutions. It is notable that at the date of the Base Prospectus Issuer has Undisbursed Credits in total amount of up to EUR 50 000 000 (fifty million euros). Issuer will seek to agree with Nordic Investment bank and AS "Citadele banka" to transform existing loan contract into refinancing loan contract and increase the Undisbursed Credits up to total amount of issued Bonds or alternatively introduce another

financing party to increase the leverage of external loan. However, these negotiations are still in progress at the date of this Base Prospectus and there is no guarantee that the Issuer will succeed in using Undisbursed Credits for refinancing payments to Bondholders.

In addition to the planned Bond issuance under this Base Prospectus, the activities of the Issuer are funded from the following sources:

1. Investors' contributions. Investments valued at fair value and as accounted for by 30 June 2024 in the amount of EUR 43 519 994.13 raised through the Lords LB Special Fund V — the Sole Shareholder of the Issuer, were utilized for the acquisition of the Land Plot and to finance subsequent development costs and working capital needs. It is planned that additional funding will be raised by the Sole Shareholder and down streamed to the Issuer to finance construction costs and the working capital requirements of the Issuer. Furthermore, if the Issuer is unable to secure refinancing for the loans received from the Sole Shareholder (refer to Section 6.4 "Related Party Transactions" for detailed list of loan agreements and amounts), an alternative plan sale of the real estate forming the Project is being considered. This strategy aims to ensure that the Bonds can be redeemed by the final Maturity Date.
2. Existing Bonds (UAB Preses Nams bonds). UAB Preses Nams, another subsidiary of the Sole Shareholder (Lords LB Special Fund V), that was operating as a bond issuance vehicle, issued earlier Existing Bonds in the total nominal amount of EUR 27 415 000. The proceeds from Existing Bonds were down streamed to the Issuer under the Intercompany Loan Agreement 1 and were directed towards covering construction costs of the Project and meeting the working capital needs of the Issuer. The redemption date for the Existing Bonds is 13 November 2025. Bondholders under the Existing Bonds will have the opportunity to exchange the Existing Bonds to the Bonds issued by the Issuer under this Base Prospectus.

If there are fluctuations in the valuation which requires increase of the Issuer's equity, Sole Shareholder's loans are capitalised to ensure compliance with legal regulation. Although the Issuer's own capital is decreasing, but has not become negative yet, therefore in the upcoming period the Sole Shareholder does not have intention to inject additional equity into Issuer and will continue financing project via sub-ordinated debts.

6.3 Material agreements

The Issuer and the Subsidiary has concluded several agreements that may be considered as material for the Issuer. The information below provides key overview on such material agreements of the Issuer and/or the Subsidiary related to the Project.

Furthermore, SIA "PN Construction Latvia" (reg.nr. 40203607935) was established under Lords LB Special Fund V in November 2024 with the sole purpose of finishing the construction of A Phase of the Project, as a general contractor company. The entity's Chairman of Management Board is Povilas Urbonavičius, Lords LB Special Fund V fund manager and Chairman of the Management Board of the Issuer. The entity hired a full team of professional construction managers and successfully resumed construction works at the Property in February 2025.

As of the date of this Base Prospectus, aside from the agreements listed in this section and Section 6.4 "Related party transactions", neither the Issuer nor the Subsidiary has entered into a material contract that could result in the Issuer being under an obligation or entitlement that is material to the Issuer's ability to meet its obligations to the Bondholders in respect of the Bonds being issued under this Base Prospectus.

6.4 Related party transactions

The Issuer has concluded several related party transactions, namely:

- (a) Intercompany Loan Agreement 1 dated 7 November 2023, concluded between the Issuer as the borrower and UAB Preses Nams as the lender. Subject to the terms and conditions set out in the Intercompany Loan Agreement 1, UAB Preses Nams as the lender shall make available to the Issuer as the borrower a loan up to a total amount of EUR 75 000 000.

Issuer anticipates that the Existing Bonds (issued by UAB Preses Nams) will be exchanged to the Bonds issued by the Issuer under this Base Prospectus and/or redeemed, and the Intercompany Loan Agreement 1 will cease to exist as part of the loan payback.

- (b) Subordination agreement dated 7 November 2023 (the "**Subordination Agreement**"), concluded between UAB Preses Nams as the junior creditor, Issuer as the subordinated debtor and the Sole Shareholder as the subordinated creditor.

Under the Subordination Agreement, the claims of the Sole Shareholder to the Issuer arising out of or in connection with the loan agreements that are detailed below are fully subordinated to the claims of the Issuer under the Intercompany Loan Agreement 1. For the avoidance of doubt, full subordination means that no payments to the Sole Shareholder shall be made by the Issuer until there are outstanding payments to UAB Preses Nams under the Intercompany Loan Agreement 1. Subordination Agreement will cease to exist after the Existing Bonds will be delisted from Nasdaq CSD.

Besides the above-mentioned, the related party transactions of the Issuer are the following:

7 PROJECT PRESES NAMA KVARTALS

Introductory remarks and brief history

The Issuer is developing and constructing the Project - a commercial development project in 2 Balasta Dambis, Riga, known as “Preses Nama Kvartals”. The Project is situated on a 5.8 ha land plot in the city centre, in the heart of the future Riga CBD – Kipsala district. In total, around 180 thousand m² of gross buildable area (GBA) will be developed during 5 separate phases of the development.

The original building of Preses Nams was built in 1978. It was designed by renowned Latvian modernist architect Jānis Vilciņš. This building was used by reporters, journalists, and editors, as it hosted several publishing offices of newspapers and magazines at the time.

The location provides opportunities for new businesses and future development and growth of Riga city. The location and Phases of the Project are visually presented below:

Currently the Issuer is developing Phases A & B of the Project. Below is a detailed overview of Phases A & B.

Overview of the Phase A & B of development

The development of the Phases A & B of the Project began shortly after acquiring the land plot in June 2017. Territorial planning procedures and design activities for the first stage ran concurrently to expedite the process. The construction permit for this phase was secured on 10 May 2020.

The Phase A of the Project involves constructing a 28 300 m² A+ class commercial building with 11 above-ground floors, while Phase B is a multifunctional structure that includes 1,000 aboveground parking spaces and approximately 7500 m² of retail space.

Additional details on the buildings developed in Phase A & B of the project are presented in the table below:

The Phase A of the Project was originally scheduled for completion in 2023. However, due to delays the completion date has been rescheduled to mid-2026 when the first tenants will be able to move into the premises.

At the date of this Base Prospectus, the Phase A is at an advanced stage. The underground components and primary load-bearing structures for nine floors are installed, the ground floor is complete with flooring, and partial facade systems on the first floor are in place. Main external networks are partially installed, and preparations are underway for upper floor and roof structures, as well as facade systems. Timeline of the construction schedule for Phase A of the project can be seen below.

In turn, frame of the Phase B is 100% completed and initial engineering works were started. It is planned that in 2025 the Issuer will decide on whether to move forward with completion of Phase B or whether to postpone it. Depending on this decision the planned amount of bonds to be issued under the Base Prospectus will change (see Financing of the Project for more details).

Tenant lead & diversification

Based on the Issuers experience, the premises due to their location and layout characteristics could be potentially attractive to shared service centers, technology companies, financial institutions, and other corporate clients as well as for coworking centers.

Lease pricing advancing from the ground to top and corresponding to additional parameters such as floorplate area or fifth floor terrace availability.

The facades of the building are prominently visible from the bustling Krišjana Valdemara Street and the Vanšu Bridge, making it an ideal choice for Tenants seeking visibility and recognition.

At the date of this Base Prospectus, there are number of lease contracts concluded with office tenants and retail tenants for the Project premises, for instance, with a financial company, technology and engineering company, *iLunch*, *Rimi*, *Deloitte*, and others. In addition, number of letters of intent (LOI) have been signed on behalf of several retail and office tenants.

Financing of the Project

Up to the date of Base Prospectus, the financing of the Phase A & B of the Project was secured and continue to be secured from sources indicated in Section 6.2 "Financing of Activities".

To complete Phase A & B and to refinance existing loans indicated in Section 6.2 "*Financing of Activities*" it is planned to issue up to EUR 75 000 000 of Bonds under this Base Prospectus. However, at the moment, the Issuer has not decided whether to continue on the development of Phase B in parallel with Phase A or to postpone the construction of Phase B until development of remaining Phases C, D & E. If the Issuer decides to postpone the construction of Phase B it is planned to issue around EUR 60 000 000 of Bonds under this Base Prospectus.

It is notable that at the date of the Base Prospectus, the Issuer has Undisbursed Credits in the total joint amount of up to EUR 50 000 000 (fifty million euros). The Issuer will seek to agree with the Nordic Investment Bank and AS "Citadele banka" to transform existing loan contract into refinancing loan contract and increase the Undisbursed Credits up to a total amount owned by the Issuer to Bondholders. However, these negotiations are in progress and there is no guarantee that the Issuer will succeed in using the Undisbursed Credits for refinancing payments to the Issuer. In case the Undisbursed Credits are unavailable or conditions for their disbursement are too strict and cannot be fulfilled, alternative financing source could be a potential sale of the assets (land plots of later stages of development of the Project).

Overview of Phase C

Phase C of the project involves development of the Hotel with around 17,000 m² of GBA.

Due to COVID-19 lockdowns and uncertain short-term results of hospitality industry, it has been decided to separate Phase C development from the Phases A & B during general contractor tender in 2020. Russia's military attack on Ukraine in February 2022 had a significant effect on attractiveness of region for tourists, hence the decision was implemented to further delay the start of construction works.

After great summer season of 2023, hospitality industry showed signs of recovery with average daily rates exceeding historical pre COVID-19 highs, however reluctance of creditors to extend financing facilities to hospitality objects are key obstacle for proceeding to development as of this date.

Overview of Phase D & E

In July 2023 building permit for the 2nd stage was received, allowing construction of 30 000m² of commercial real estate development to begin immediately. Active work with potential anchor tenants has started and as soon as first contracts will be signed, the construction will commence.

The design work for future stages has not begun at the date of this Base Prospectus, however, it is anticipated that approximately 70 000m² of gross buildable area of commercial property will be developed during these stages. Preparatory works such as utility connection points will be completed with the construction of the Phases A & B. Hence, future land plot development will have:

- External networks of required capacity developed till the border of every land plot;
- Welcoming landscape and common accessible premises attracting future office tenants;
- The availability of numerous parking spaces in the 1st stage enables the development of approximately 50,000m² of office space without the need for additional investments in parking facilities.

8 PRINCIPAL MARKETS

This Section provides an overview of the operating segments and competitive position of the Issuer. The key operations relate to construction of residential and non-residential buildings, rental and operating of own or leased real estate, as well as related management services. The information included in this Section has been obtained through diverse public and private sources, and it is provided only for informative purposes. To the best of its abilities the Management Board has sought to ascertain and accurately reproduce the following information, omitting no facts which could render the reproduced information misleading or inaccurate. However, the Management Board accepts no further responsibility in respect to information contained herein. Prospective investors should read this Section 8 "Principal Markets" together with information provided elsewhere in this Base Prospectus, including Section 2 "Risk Factors", Section 11 "Selected Financial Information and Operating Data".

8.1 Principal activities, Competitive position and strengths

Taking into account the significant and relevant knowledge base of the Management Company, the Issuer feels confident about its capacity to successfully further develop the Project and become an active player in the commercial building segment in Latvia, particularly offering good quality, sustainable and energy efficient office buildings, served with additional modern amenities expected and valued by perspective tenants (e.g., parking, multifunctional spaces, such as retail space, food court, sports field area). It should also be noted that there is a strong market demand in Latvia, particularly in Riga, for good quality, sustainable and energy efficient office buildings that continue to increase due to various environmental, social, and governance (ESG) requirements and experienced energy crisis.

The Issuer and Subsidiary plans to continue to develop a substantial amount of lease area for potential Central Business District (**CBD**) of Riga. It is expected that total capacity of future central business centre of Riga in close vicinity of Kipsala, when considering already developed, under development and planned development, commercial area could amount to just over 350 thousand m². The Issuer and Subsidiary share of that would be 180 thousand m², or just over 50% according to Issuer's estimates. The Project benefits of several advantages related to its quality, sustainability and energy efficiency standards compared to current office stock in Riga around half of which consists of building that are older than 15 years with around 20% of the buildings being older than 5 years. Consequently, only around a third of existing office stock is certified versus 90%+ expected certification of buildings that are currently under construction according to Issuer's estimates.

The Project is also located in the city centre in the heart of the future Riga CBD – Kipsala district. Location offers a strategic advantage for office buildings with its proximity to the city centre and key business hubs. The district's accessibility together with a growing infrastructure, makes it an attractive location for businesses.

Finally, the Project is being developed with assistance and oversight of the Management Company, a leading provider of investment management services in real estate and energy & infrastructure. Major competitive advantages of the Management Company include:

- **Proven track record:** the Management Company highlights its extensive track record of successful investments and consistent returns over the years, showcasing its reliability and expertise in navigating various market conditions. Please see below the notable projects in Vilnius central business district, which are a part of the Management Company managed funds activities.

- **Strategic partnerships:** The Management Company emphasizes its strategic partnerships with reputable auditing firms, banking institutions, and other industry stakeholders, enabling it to leverage specialized expertise, resources, and networks to enhance value for clients.

- **Regulatory compliance and governance:** The Management Company being a licensed entity, supervised by the Bank of Lithuania, highlights its commitment to regulatory compliance, stringent governance standards, and ethical business practices.

8.2 Recent trends, developments and significant change

The information presented in this Section is a brief overview of the macroeconomic, real estate and office markets analysis conducted by different sources, including *Newsec* (a licensed provider of property and business valuation services), *Colliers* (a global leader in real estate services and investment management), as well as other publicly available data at the date of this Base Prospectus and Central Bank of Latvia.

Macroeconomic trends in Latvia

The Bank of Latvia December 2024 macroeconomic forecast indicates a stagnation in Latvian economy with GDP growing by only 0.1% and inflation at 1.3%, however stronger growth is expected in 2025, supported by private consumption, exports, and investments. The shorter-term outlook depends on the uncertainty in Germany and Donald Trump's intentions to impose high import tariffs after assuming the US presidency, as well as developments in Europe's neighbouring regions. A possible solution to Ukrainian conflict would significantly boost investment environment in Latvia.

Riga office market trends

Colliers in Q4 2024 Riga Office Market Overview reported that currently around GLA 73,000 sqm of office space is under construction, around 40% of which is planned to be commissioned in 2025. Several projects that could be started remain on hold waiting for anchor tenant. Two A-class office facilities were delivered in 2024 – the 20 500m² Novira Plaza in Active centre district and 13 700 m² Verde II in Skanste district. Novira Plaza is in the very heart of Riga, just next to the existing Origo One business centre and the Satekles Business Center. Verde II location is the developing CBD area of Skanste, and according to the developer, it is already 100% leased out.

Occupancy in new developments as well as complexes that constantly improve are increasing, however older developments are struggling and some of them might even leave the office market and adjust for new needs. For projects that started the development after the hike of the construction costs, asking rent rates start from 18 EUR/sqm/m with Finance, Banking, Insurance, IT and Professional services making the highest demand for office space.

With the hybrid work remaining allowed in most companies, on average smaller office premises are being demanded with the medium tenant being around 400 sqm large. Due to hybrid work, required office area has decreased by 20-30%, this allows tenants to choose higher quality offices and pay higher rental rates

while keeping the total office costs intact. Hybrid work trend however could reverse soon, as more employers globally join the “back to office” trend, boosting occupancy.

Market demand for good quality, sustainable and energy efficient office buildings continue to increase due to ESG requirements and experienced energy crisis. Notable tenants rarely choose older buildings as they do not meet the criteria. Almost 55% of lease transactions are within new stock (primary occupation) and almost 70% are within certified office buildings.

Take-up activity remains stable, for the last 2 years annual take-up has exceeded 50,000 sqm. A growing interest towards Class B offices could be observed as tenants look to move from non-competitive stock to more energy-efficient locations. Class B projects are attracting tenants by enhancing spaces and social environments, as well as by offering additional amenities, which also encourage lease renewals.

The Audited Financial Statements have been audited and reviewed by "KPMG Baltics SIA" and incorporated by a reference.

The following material uncertainty related to going concern is included in the Independent Auditor's Report for the years ended 31 December 2023, and 31 December 2022:

We draw attention to Note 3.18. of the consolidated financial statements, which states that as at 31 December 2023 the Group had a working capital deficit equal to EUR 31 599 710, of which EUR 20 094 463 related to the loan received from Matuda UAB with the maturity of 26 April 2024 and EUR 11 219 375 related to amounts payable to suppliers and contractors.

Furthermore, in October 2024 the Group has terminated the contract with its general contractor and, as of the date of this report, the operations of the Group – the development of the multifunctional real estate centre on its controlled land plot – are suspended. During the building development and construction period the Group has been financed by the funds received from the shareholder and/or its controlled entities considering the course of the project and the need of working capital to finance the construction activities. The Group's ability to continue operations on a going concern basis is highly dependent on the Group's ability to attract additional financing, settle its outstanding liabilities and resume the real estate development project. At the date of these consolidated financial statements, the Group, its shareholder and its other controlled SPVs have not received a written confirmed financing commitment from the potential investors. These events and conditions, along with other matters as set forth in Note 3.18., indicate that a material uncertainty exists that may cast significant doubt on the Group's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

11.2 Insight in the Group's Financial Standing

The Group does not earn income independently as the Group's main activity is development of a multifunctional real estate centre on its controlled land plot in Balasta Dambis 2, Riga, Latvia. The Group continues to invest in its investment property. As of 30 September 2024, the Investment property value reached EUR 62 610 000 based on the independent real estate appraiser.

The development of the Group's investment property is financed by equity contributions and intercompany loans from shareholder and other Group companies operating in Lithuania. As of 31 December 2023, the loans received amounted to EUR 53,5M and increased by EUR 5M from EUR 45,6M as of 31 December 2022. Based on the unaudited financial data as of 30 June 2024, the loans received amounted EUR 52,3M.

Recent trends and developments and long-term objectives

The Group's plan is to resume the construction of the 1st stage of the real estate project in Q1 2025 and to finalize it by mid-2026. After which the Group is expected to start independently generating rental income and positive net cash flows from operations supporting the Group's going concern going forward.

Currently, it is planned that the 2nd stage construction of 31 000 sqm of buildable area for the office and school complex, for which the building permit was received in June 2023, will start when anchor tenants will be found. The work on the 3rd stage development of 65 000 sqm of buildable area is currently in the concept stage, looking for the most appropriate development scheme, which would complement other already designed stages. The construction of the hotel building, for which the building permit was received in year 2020, is still on hold due to decreased appetite of financial institutions for hospitality object financing.

The development of real estate project planned to be financed by issuing Bonds under this Base Prospectus.

Except for the progress and updates regarding legal proceedings involved by the Issuer (as further described in Section 8.5 "Legal Proceedings" of this Base Prospectus), please note that there have been no material changes in the Issuer's borrowing and funding structure since the last financial year. In addition, SIA "PN Construction Latvia" (reg.nr. 40203607935) was established under Lords LB Special Fund V in November 2024 with the sole purpose of finishing the construction of A Phase of the Project, as a general contractor company. The entity's Chairman of Management Board is Povilas Urbonavičius, Lords LB Special Fund V fund manager and Chairman of the Management Board of the Issuer. The entity hired a full team of professional construction managers and successfully resumed construction works at the Property in February 2025.

11.3 Financial Indebtedness

Since the Group does not earn income independently it requires sufficient funds in order to develop real estate located at Balasta Dambis 2, Riga, Latvia. The funding was provided by shareholder via equity and loans as well as by other Group companies. The capital and the borrowing structures of the Group are provided in the tables below.

Total loans received	52 352 493	53 507 669	45 468 963	48 246 302

The total loans received as of 30 June 2024 amounted to EUR 52,4M and represented 69,4% of the total amount of the Group's gross debt. Most of the borrowings are comprised of loan from sister company Preses Nams UAB for the amount of EUR 25,8M and shareholder Lords LB Special Fund V for the amount of EUR 16,6M.

The total short-term borrowings as of 30 June 2024 were EUR 1,9M representing 2,5% of the total amount of the Group's gross debt. Most of the short-term borrowings are comprised of EUR 1,5M of loan and accrued interests from Matua UAB.

The long-term debt as of 30 June 2024 was EUR 50,5M, representing 67,0% of the total amount of the Group's gross debt. Most of the long-term borrowings are comprised of EUR 26,5M of loan and accrued interests from Preses Nams UAB.

Loans from Lords LB Special Fund V

The Group and the shareholder Lords LB Special Fund V have entered into two loan agreements on 15 November 2018 and 31 January 2022. The interest rates for both agreements are fixed and the maturity dates for both agreements are on 13 May 2026. The loans for the amount of EUR 16,6M together with share capital for the amount of EUR 32,2M (total EUR 48,8M) were used to finance the design and start of the construction of 1st stage of the real estate project.

Loans from Matuda UAB and Presses Nams UAB

As the development of the 1st stage project required additional financing, the group company Matuda UAB has issued non-public bonds in Lithuania and in turn entered into loan agreement with the Group on 21 April 2022, with the maturity date on 6 May 2024, in order to lend the funds received to the Group. The loan agreement contained the same terms and conditions as the main bond agreement by Matuda UAB, meaning that the Group had to comply with set covenants and reporting terms as well as interest and nominal repayments. The interest rate set in the agreement was fixed. Based on the loan agreement, the

loans from the shareholder were subordinated against the loan from Matuda as well as the real estate owned by the Group pledged against the bond holders.

As the term for bonds issued by Matuda UAB and respectfully loan agreement between Matuda UAB and the Group has neared to an end, another group company Preses Nams UAB has issued new non-public bonds in Lithuania in order to lend the funds to the Group and refinance the loan from Matuda UAB. The Group has entered into the loan agreement on 7 November 2023 with the maturity date on 13 November 2025. The loan agreement contains the same terms and conditions as the main bond agreement by Preses Nams UAB, meaning that the Group has to comply with set covenants and reporting terms as well as interest and nominal repayments. The interests calculated by Preses Nams UAB are directly reimbursed to the Group. Based on the loan agreement, the loans from the shareholder were subordinated against the loan from Preses Nams UAB as well as the real estate owned by the Group pledged against the bond holders.

On April 2024, the loan from UAB Matuda was successfully refinanced, with the remaining amount of EUR 1,5M transferred to new loan agreement on 7 May 2024, not related to the issued bonds by Matuda UAB. The loan agreement's maturity date was 31 December 2024, and the set interest rate was fixed.

11.4 Alternative Performance Measures (APM)

This Base Prospectus contains certain financial and operating performance measures that are not defined or recognised under the IFRS and which are considered to be "alternative performance measures" as defined in the "ESMA Guidelines on Alternative Performance Measures" issued by the European Securities and Markets Authority on 5 October 2015 (the "APMs" or "Alternative Performance Measures"). Since the Group does not earn income independently and it's activity is the development of real estate, the selected APMs for this Base Prospectus were: NAV, Investment Property/ Assets ratio, Equity/Assets ratio, Loan-to-Cost (LTC) ratio. The APMs are presented in the table below:

Selected Alternative performance measures

Item	30 June 2024 (unaudited)	30 June 2023 (unaudited)	31 December 2023 (audited)	31 December 2022 (audited)
Net Asset Value	13 967 871	10 875 428	19 467 487	12 785 782
Investment Property/Assets, %	96.0%	97.2%	92.6%	96.4%
Equity/Assets, %	17.6%	16.1%	24.8%	19.5%
Loan-to-Cost, %	32.3%	33.0%	28.1%	29.8%

Net Asset Value

Net Asset Value = Total assets – Total liabilities

Net Asset Value represents the value of the Group's total assets minus its liabilities. It is commonly used to express the per-share value of an investment fund but also applies broadly to measure the Group's underlying value after accounting for liabilities.

Investment property / Assets

Investment Property / Assets Ratio = Total Investment Property Value / Total Assets

The ratio measures and demonstrates how much the company is reliant on development property as its main asset and business. A high ratio signals reliance on investment property as the main asset and business of the Group.

Equity / Assets

Equity / Assets Ratio = Total Equity – Total Assets

The ratio measures how well the company is capitalized and how strong is its balance sheet. Higher ratio means more equity capital and more robust balance sheet of the Group.

Loan-to-Cost

Loan-to-Cost Ratio = Total loans received / Total investment property development costs

The Loan-to-Cost (LTC) ratio indicates the proportion of a loan relative to the already incurred costs to develop the asset securing the loan. It reflects the risk to lenders, with a lower LTC suggesting that the loan represents a smaller portion of the asset's value, thereby reducing lender risk. Cost includes all incurred and planned future costs, are calculated according to the latest budget of the project.

This Base Prospectus includes certain references to alternative performance measures (APMs) derived from the Group's Financial Information shown in the table above. This information should be viewed as supplemental to the Group's Financial Information. Investors are cautioned not to place undue reliance on this information and should note that the APMs, as calculated by the Group, may differ materially from similarly titled measures reported by other companies, including the Group's competitors. The APMs presented in this section are not defined in accordance with IFRS. An APM should not be considered in isolation from, or as substitute for any analysis of, financial measures defined according to IFRS.

Specific terms and conditions specified in the applicable Final Terms may be different in respect of each individual Tranche. To identify each Tranche, the Final Terms shall stipulate a serial number of the respective Tranche.

The Shareholders' Meeting held on 22 April 2025 authorised the issuance, public offering and listing of the Bonds, and authorised the Management Board to approve the Terms and Conditions, the Base Prospectus, the Final Terms and any of the documents thereto, as well as any amendments and supplements thereof.

Each Final Terms issued in respect of each issue of Bonds shall be approved by a separate resolution of the Management Board.

However, if required by the Nasdaq CSD it is possible that each Tranche will be assigned a separate ISIN. In any case, the ISIN code of the respective Tranche will be specified in the Final Terms.

12.4 Status of the Bonds

There is a mortgage for Existing Bonds (to UAB "AUDIFINA"), mortgage claim from previous general contractor AS "UPB" and pledge marks from two general contractors – AS "UPB" and UAB "YIT Lietuva", and recovery notation from AS "UPB". For the benefit of AS "UPB" a recovery notation in the amount of EUR 2 786 060.47 is registered in the Land Book of the Property at the date of this Base Prospectus. Until this recovery notation is removed, the Issuer will not be able to register the Collateral in favour of the Collateral Agent to hold for the benefit of the Bondholders.

The Issuer is in the process of negotiating the removal of the recovery notation. However, if the recovery notation is not removed and therefore the Collateral is not registered and an Event of Default occurs within this period, Bondholders will be treated as unsecured creditors of the Issuer.

There are no restrictions on the transfer of the Bonds as they are described in the applicable Latvian law. However, any Bondholder wishing to transfer the Bonds must ensure that any offering related to such transfer would not be qualified as an offering requiring the publication of a prospectus in the meaning of the applicable law. Ensuring that any offering of the Bonds does not require publication of a prospectus under the applicable law is the obligation and liability of the Bondholder.

The Bonds can be transferred from one securities account to another by the registrar of Nasdaq CSD by way of debiting the first securities account and crediting the other securities account in the amount of the corresponding number of securities. Ownership of a Bond is deemed to have changed in respect of the Issuer as from the moment a relevant entry is made in Nasdaq CSD, i.e., when a Bond is transferred to the securities account of the respective Bondholder.

12.21 Financial Covenant

- 12.21.1 From the Issue Date of the Bonds and as long as any Bond is outstanding, the Issuer shall comply with the following financial covenant: to maintain the LTC ratio at or below 75%. The LTC shall be calculated based on the following formula:

$$LTC = \frac{\text{Total Loan Size}}{\text{Costs of the Project}} \times 100\%$$

where:

LTC shall mean loan to cost ratio. A lower LTC ratio indicates less risk for the Issuer, as the Issuer has a larger equity stake in the Project. The higher LTC ratio implies a greater Issuer's reliance on borrowed funds.

Total Loan Size shall mean a total amount of outstanding loans actually disbursed to the Issuer, including these Bonds, on the date when the LTC ratio is being calculated.

Costs of the Project shall mean (without double-counting) expenditure by the Issuer in carrying out the Project, including each of the following:

- (a) all sums paid or to be paid under the design, construction and other contracts with respect to the development of the Project after date of this Base Prospectus;
- (b) the aggregate of the invoices issued or to be issued to the Issuer for other costs such as legal, accounting, notarial, project management, and other professional fees, costs and expenses (including the costs of registries and any related taxes) incurred by the Issuer in connection with the Project, operating costs;
- (c) the premium paid or to be paid or to be paid in respect of insurances (other than insurances to be effected and paid for by any construction contractor);
- (d) debt financing costs which become due and payable with respect to the Project.

Costs of the first stage of the Project are estimated to be EUR 162 000 000 (one hundred fifty-four million euros) (net of VAT).

- 12.21.2 Financial covenant set forth in Clause 12.21.1 shall be tested at the end of each quarter and proof of compliance with this financial covenant shall be reported to the Collateral Agent within 30 (thirty) days after the end of each quarter by the Issuer.
- 12.21.3 The Issuer may in its sole discretion choose to calculate the financial covenant under Clause 12.21.1 in accordance with the Accounting Principles.

A Change of Control shall be deemed occurred if the Sole Shareholder of the Issuer after the first Issue Date cease to own more than 50% of the ordinary issued shares and voting rights of the Issuer or may not exercise the control of the Issuer due to other legal restrictions. The Issuer's Change of Control does not occur in case of restructuring within the structure of the companies under the Sole Shareholder (i.e., if the new shareholder(s) of the Issuer are Related Parties).

- 12.22.6 **Full subordination of shareholders' claims.** The claims of the Sole Shareholder to the Issuer are fully subordinated to the Bonds. For the avoidance of doubt, full subordination means that no payments to the Sole Shareholder shall be made by the Issuer until there are outstanding payments to the Bondholders under this Base Prospectus, Terms and Conditions and Final Terms.
- 12.22.7 **Admission to trading.** The Bonds of each Tranche are admitted to trading on Nasdaq Riga within 3 (three) months from the placement of the respective Tranche.

The Arranger and the Issuer when submitting the instructions will observe the conditions set forth in this Section as long as they are not contradictory to conditions set forth in Clauses 13.5.11, 13.5.12 and 13.5.13 of this Base Prospectus. Consequently, the end result for these Bondholders will be the same as for others participating in the Exchange Offering; however, it will occur through the Arranger, the Issuer and the Nasdaq CSD, and involve two simultaneous corporate actions instead of one.

Additionally, as set forth in Article 23 of the Prospectus Regulation, an Investor may withdraw a Subscription Order for the Bonds of the respective Tranche by submitting a written statement to the Custodian where the subscription was made at any time until the end of the Subscription Period of the respective Tranche if any supplement or amendment to the Base Prospectus is made public concerning an event or circumstances occurring before the allocation of the Bonds, of which the Issuer became aware prior to allocation of the Bonds, within 2 (two) Business Days as from the date of the publication of the supplement or amendment to the Base Prospectus.

13.9 Payment for the Bonds

- 13.9.1 By submitting a Subscription Order, each Retail Investor shall authorise and instruct the Custodian operating the Retail Investor's cash account connected to the Retail Investor's securities account to immediately block the whole subscription amount on the Retail Investor's cash account until the payment for the allotted Bonds is completed or until the funds are released in accordance with this Base Prospectus. The subscription amount to be blocked will be equal to the Offer Price multiplied by the amount of the Bonds, the respective Retail Investor wishes to subscribe for. A Retail Investor may submit a Subscription Order only when there are sufficient funds on the cash account connected to the securities account. If the blocked funds are insufficient, the Subscription Order will be deemed null and void to the extent funds are insufficient.
- 13.9.2 The Retail Investors who have not been allotted any Bonds or whose Subscriptions have been reduced will receive reimbursements of the payment made upon placing the Subscription Order (or the blocked funds will be released) in accordance with instructions provided by each such Retail Investor, as required under the procedures applicable in the investment firm or credit institution with which the Subscription Order was placed. The reimbursement will take place (or the blocked funds will be released) within 10 (ten) Business Days as from the end of the Subscription Period or from the date of the publication of the supplement to this Base Prospectus on the cancellation of the Offering. The payments shall be returned (or the blocked funds will be released) without any reimbursement for costs incurred by the Retail Investors in the course of subscribing for the Bonds and shall be net of all transfer expenses, without interest.
- 13.9.3 In respect of Private Placement of the Bonds the Institutional Investor shall consent to the obligation to ensure the subscription amount on the settlement date on the Delivery Versus Payment (DVP) terms in accordance with Nasdaq CSD rules.

All Existing Bondholders who have elected to participate in the Exchange Offer (observing the exchange ratio) and creditors participating in the Conversion Offering shall be allotted the Bonds fully.
- 13.10.5 The Issuer will establish the exact amount of the Bonds to be allotted with respect to each Subscription Order.
- 13.10.6 As a general principle, if the total number of the Bonds subscribed for (including the Bonds exchanged during the Exchange Offer) is equal to or less than the number of the Bonds and the Issuer decides to proceed with the Offering of the respective Tranche of Bonds, the Bonds will be allotted based on the Subscription Orders placed.
- 13.10.7 In case the total number of the Bonds subscribed for is higher than the number of the Bonds and the Issuer decides to proceed with the Offering, the Bonds may be allocated to them in an entirely discretionary manner of the Issuer.
- 13.10.8 If any additional provisions would be applied to the allocation of the separate Tranche of the Bonds, these will be specified in the Final Terms for the Offering of the relevant Tranche.
- 13.10.9 The division of Bonds between the retail and institutional investors has not been predetermined. The Issuer will determine the exact allocation at its sole discretion.
- 13.10.10 Under the same circumstances, all Investors shall be treated equally, whereas depending on the number of Investors and interest towards the Offering, the Issuer may set minimum and maximum number of the Bonds allocated to one investor, which will apply equally to both – the Retail Investors and the Institutional Investors. If such approach is chosen, it will be further specified in the respective Final Terms.
- 13.10.11 The allocation shall be aimed to create a solid and reliable Investor base for the Issuer.
- 13.10.12 The Issuer shall be entitled to prefer its Existing Bondholders to other Investors.

Information about the Results of the Offering

- 13.10.15 Information about the results of the Offering of each Tranche (amount of the Bonds issued and an aggregate principal amount of the respective Tranche) shall be published on the Issuer's website www.lordslb.lt/presesnams_bonds/ as well as at www.nasdaqbaltic.com.

13.11 Cancellation, Suspension or Postponement of the Offering

- 13.11.1 The Issuer may cancel the Offering of the Bonds of any Tranche at any time prior to the Settlement Date without disclosing any reason for doing so. The Issuer may also change the dates of opening and closing of the Subscription Period, or decide that the Offering of any of the Tranches will be postponed and that new dates of the Offering will be provided by the Issuer later.

- 13.11.2 In such an event, Subscriptions for the Bonds that have been made will be disregarded, and any Subscription payments made will be returned (or the blocked funds will be released) without interest or any other compensation.
- 13.11.3 The Issuer will make any decision on cancellation, suspension, postponement or changes of the dates of the Offering and will publish such decision in a manner compliant with applicable regulations, as well as market practices in Latvia.

13.12 Settlement and Delivery

- 13.12.1 The settlement of the Offering will be carried out by Nasdaq CSD. The Bonds allocated to Retail Investors and Institutional Investors will be transferred to their securities accounts through the "delivery versus payment" method pursuant to the applicable rules of Nasdaq CSD simultaneously with the transfer of payment for such Bonds. The title to the Bonds will pass to the relevant Retail Investors and Institutional Investors when the Bonds are transferred to their securities accounts. If Retail Investor or Institutional Investor has submitted several Subscription Orders through several securities accounts, the Bonds allocated to such Retail Investor or Institutional Investor will be transferred to all such securities accounts proportionally to the number of the Bonds indicated in the Subscription Orders submitted for each account, rounded up or down as necessary. The settlement will take place on the Issue Date. All paid up Bonds shall be treated as issued.
- 13.12.2 For all the Existing Bonds to be exchanged with the Bonds, the Nasdaq CSD will instruct the relevant Nasdaq CSD member to transfer the total number of the Bonds to its clients, which in turn will transfer specific number of the Bonds to each of the Investors.
- 13.12.3 For the Conversion Offering, Nasdaq CSD will instruct the Arranger to transfer the number of Bonds specified in the Conversion Agreement as a free-of-payment (FOP) transaction to the securities account of the respective creditor listed in the Conversion Agreement.

The Issuer shall take all the measures, established in Nasdaq rules, needed that the Bonds would be admitted to trading on Nasdaq Riga as soon as practicably possible.
- 13.13.3 The Issuer expects that the Bonds of the respective Tranche shall be admitted to trading on Nasdaq Riga within 3 (three) months as from placement thereof to the investors at the latest. Disregarding this, the Issuer will put its best endeavours so that these terms would be as short as practicable possible.
- 13.13.4 The Issuer shall also put its best efforts to ensure that the Bonds remain listed on the Nasdaq Riga. The Issuer shall, following a listing or Admission to trading, take all reasonable actions on its part required as a result of such listing or trading of the Bonds.
- 13.13.5 The Issuer will cover all costs, which are related to the Listing of the Bonds on Nasdaq Riga.

14 INFORMATION ABOUT THE COLLATERAL

If not provided otherwise in this Section of the Base Prospectus, words and expressions defined in the Terms and Conditions above or elsewhere in the Base Prospectus have the same meaning in this Section of the Base Prospectus.

Nature and scope of the Collateral

The due and timely payment, discharge and performance of the Bonds by the Issuer shall be secured by the Collateral.

Each Tranche of the Bonds will be secured by mortgage over the Property, i.e., over real estate property with unique cadastre number 0100 062 0093, Riga city land register folio No. 13063 with address Balasta dambis 2, Riga, the Republic of Latvia, which on the date of this Base Prospectus includes land property (cadastre designation 0100 062 0137), existing publishing house building (cadastre designation 0100 062 0093 001), multifunctional centre building under construction (cadastre designation 0100 062 0093 002), business centre building under construction (cadastre designation 0100 062 0137 001), guard building (cadastre designation 0100 062 0093 004) and pump station (cadastre designation 0100 062 0093 006) (the **Mortgage** or the **Collateral**).

The maximum amount of secured claim will be up to EUR 82 500 000 for the benefit of the Bondholders, with the particular claim amount specified in the Final Terms of the respective Tranche according to the total aggregate amount of Bonds issued under the Programme at the time.

The Collateral shall be established in accordance with the terms and conditions of the Collateral Agreement to be concluded between the Collateral Agent as the mortgagee and the Issuer as the collateral provider (mortgagor) with regards to establishment of the mortgage over the Property and the respective Collateral shall be registered in the Land Register within 60 (sixty) Business Days after the Issue Date of the first Tranche under the respective Final Terms.

At the date of this Base Prospectus there are several pledge marks, prohibition marks and mortgage claims to the Property entered in the Land Register. There is a mortgage for Existing Bonds (to UAB "AUDIFINA"), mortgage claim from previous general contractor AS "UPB" and pledge marks from two general contractors – AS "UPB" and UAB "YIT Lietuva", and recovery notation from AS "UPB". Management Board of the Company expects to delete these pledge marks and mortgage claims after the Exchange Offering and first or second tranche of Bonds issuance, if sufficient funds are attracted. For the benefit of AS "UPB" a recovery notation in the amount of EUR 2 786 060.47 is registered in the Land Book of the Property at the date of this Base Prospectus. Until this recovery notation is removed, the Issuer will not be able to register the Collateral in favour of the Collateral Agent to hold for the benefit of the Bondholders. The Issuer intends to resolve this matter and complete the registration of the Collateral within 60 Business Days following the issuance of the first or second tranche of the Bonds. If the Issuer fails to remove the recovery notation and register the Collateral, the Bonds will remain unsecured, which may affect the Bondholders' ability to recover their invested capital.

15 TAXATION

Tax legislation of the investor's member state and of the Issuer's country of incorporation may have an impact on the income received from the Bonds. The following is a general summary of certain tax consideration in the Republic of Latvia in relation to the Bonds. It is not exhaustive and does not purport to be a complete analysis of all tax consequences relating to the Bonds, as well as does not consider or discuss the tax implications of any country other than the Republic of Latvia. The information provided in this section shall not be treated as legal or tax advice. Tax rates and conditions for paying taxes may change during the life of the Bonds. Prospective investors are advised to consult their own tax advisors as to the tax consequences of the subscription, ownership and disposal of the Bonds applicable to their circumstances.

This summary is based on the laws of Latvia as in force on the date of this Base Prospectus and is subject to any change in law that may take effect after such date, provided that such changes could apply also retroactively.

Latvia has entered a number of tax conventions on elimination of the double taxation, which may provide more favourable taxation regime. Therefore, if there is a valid tax convention with the country of a non-resident prospective investor, it should be also examined. The procedures for application of tax conventions are provided in the Republic of Latvia Cabinet of Ministers' Regulations No. 178 "Procedures for Application of Tax Relief Determined in International Agreements for Prevention of Double Taxation and Tax Evasion" of 30 April 2001.

Special rules apply if the transactions with the Bonds are made through an investment account within the meaning of the Law on Personal Income Tax (in Latvian – *Likums "Par iedzīvotāju ienākuma nodokli"*). In such case taxation of income is deferred until the moment when the amount withdrawn from the investment account exceeds the contributed amount.

The capital gains from the sale of the Bonds will be subject to 20 per-cent tax, but the tax would be payable by the individual him/herself.

Non-resident individuals

An individual will be considered as a non-resident of Latvia if the individual does not qualify as a resident individual under Latvian laws.

In accordance with the Law on Personal Income Tax (in Latvian – *Likums "Par iedzīvotāju ienākuma nodokli"*) the interest income from the Bonds being circulated publicly as well as income from the alienation of the publicly circulated Bonds will not be subject to tax in Latvia.

Each non-resident individual, however, should always seek professional advice and determine if any tax obligations with regards to taxation and reporting are applicable under the domestic law of his/her country of residence.

15.2 Taxation of the Bondholders entities

Resident entities

An entity will be considered as a resident of Latvia for tax purposes if it is or should have been established and registered in the Republic of Latvia in accordance with the legislative acts of the Republic of Latvia. This also include permanent establishments of foreign entities in Latvia.

Interest (coupon) income and a capital gain from the Bonds constitute a part of the beneficiary's – Latvian company's overall income. The Corporate Income Tax obligation is deferred to the moment of profit distribution (dividends, interim dividends) or deemed profit distribution (e.g., deemed dividends, non-

business expenditure, bad debts provisions/write-off, loans to the related persons, transfer pricing adjustments, liquidation quota) of the beneficiary – Latvian company. The tax is assessed and paid based on the Corporate Income Tax Return filed for a taxation period (a month or year).

Profit distributions are taxed at the rate of 20% of the gross amount of the distributions (tax base is divided by 0.8 and then tax applied at the rate of 20% resulting in the effective rate of 25%).

Non-resident entities

An entity will be considered as a non-resident of Latvia if the entity does not qualify as a resident entity under Latvian laws.

In accordance with the Corporate Income Tax Law of Latvia (in Latvian – *Uzņēmumu ienākuma nodokļa likums*) the interest (coupon) income and income from the alienation of the Bonds for non-resident entities will not be taxable in Latvia.

Each non-resident entity should determine if any tax obligations with regards to taxation and reporting are applicable under the domestic law of its country of residence.

15.3 Taxation of low-tax non-residents

In general, payments (including interest payments) to non-residents located, registered or incorporated in a no-tax or low-tax country or territory as prescribed by Regulations of the Cabinet of Ministers No. 333 "List of Low-Tax or No-Tax Countries and Territories", adopted on 27 June 2023; effective as of 1 July 2023 ("**Low-Tax Non-Latvian Residents**") are subject to withholding tax of 20 per-cent if the payer is a Latvian legal entity or 23 per-cent if the payer is a Latvian individual resident having obligation to withhold tax.

However, pursuant to Article 5(6) of the Corporate Income Tax Law (in Latvian – *Uzņēmumu ienākuma nodokļa likums*) payments by Latvian legal entities to Low-Tax Non-Latvian Residents for securities publicly circulated in the EU or EEA are exempt from withholding tax if made at the market price. The State Revenue Service of the Republic of Latvia in a legally non-binding explanation in the context of an issue of debt bonds by another issuer has confirmed that, pursuant to Article 5(6) of the Corporate Income Tax Law (in Latvian – *Uzņēmumu ienākuma nodokļa likums*), there is no withholding tax also on the interest payments made by an issuer to the holders of the bonds publicly circulated in the EU or EEA who are Low-Tax Non-Latvian Residents, provided that the payments are made at the market price.
